ACS DEMOGRAPHIC AND HOUSING ESTIMATES

Survey/Program:

American Community Survey

Year: 2019

Estimates: 5-Year

Table ID: DP05

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Source: U.S. Census Bureau, 2015-2019 American Community Survey 5-Year Estimates

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

The 2015-2019 American Community Survey (ACS) data generally reflect the September 2018 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances, the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineation lists due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

An "**" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution, or the margin of error associated with a median was larger than the median itself.

An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution. An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution. An "***" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An "*****" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An "N" entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An "(X)" means that the estimate is not applicable or not available.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

SELECTED ECONOMIC CHARACTERISTICS

Survey/Program:

American Community Survey

Year: 2019

Estimates: 5-Year

Table ID: DP03

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Source: U.S. Census Bureau, 2015-2019 American Community Survey 5-Year Estimates

2019 ACS data products include updates to several categories of the existing means of transportation question. For more information, see: Change to Means of Transportation.

Between 2018 and 2019 the American Community Survey retirement income question changed. These changes resulted in an increase in both the number of households reporting retirement income and higher aggregate retirement income at the national level. For more information see Changes to the Retirement Income Question .

The categories for relationship to householder were revised in 2019. For more information see Revisions to the Relationship to Household item.

Beginning in data year 2019, respondents to the Weeks Worked question provided an integer value for the number of weeks worked. For data years 2008 through 2018, respondents selected a category corresponding to the number of weeks worked.

Occupation titles and their 4-digit codes are based on the Standard Occupational Classification (SOC). The Census occupation codes for 2018 and later years are based on the 2018 revision of the SOC. To allow for the creation of the multiyear tables, occupation data in the multiyear files (prior to data year 2018) were recoded to the 2018 Census occupation codes. We recommend using caution when comparing data coded using 2018 Census occupation codes with data coded using Census occupation codes prior to data year 2018. For more information on the Census occupation code changes, please visit our website at https://www.census.gov/topics/employment /industry-occupation/guidance/code-lists.html.

In 2019, methodological changes were made to the class of worker question. These changes involved modifications to the question wording, the category wording, and the visual format of the categories on the questionnaire. The format for the class of worker categories are now listed under the headings "Private Sector Employee," "Government Employee," and "Self-Employed or Other." Additionally, the category of Active Duty was added as one of the response categories under the "Government Employee" section for the mail questionnaire. For more detailed information about the 2019 changes, see the 2016 American Community Survey Content Test Report for Class of Worker located at http://www.census.gov/library/working-papers/2017/acs/2017_Martinez_01.html.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of

12/10/2020

nonsampling error is not represented in these tables.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to Labor Force Guidance.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry titles and their 4-digit codes are based on the North American Industry Classification System (NAICS). The Census industry codes for 2018 and later years are based on the 2017 revision of the NAICS. To allow for the creation of multiyear tables, industry data in the multiyear files (prior to data year 2018) were recoded to the 2017 Census industry codes. We recommend using caution when comparing data coded using 2017 Census industry codes with data coded using Census industry codes prior to data year 2018. For more information on the Census industry code changes, please visit our website at https://www.census.gov/topics/employment/industry-occupation/guidance/code-lists.html.

Logical coverage edits applying a rules-based assignment of Medicaid, Medicare and military health coverage were added as of 2009 – please see https://www.census.gov/library/working-papers/2010/demo/coverage_edits_final.html for more details. Select geographies of 2008 data comparable to the 2009 and later tables are available at https://www.census.gov/data/tables/time-series/acs/1-year-re-run-health-insurance.html. The health insurance coverage category names were modified in 2010. See

https://www.census.gov/topics/health/health-insurance/about/glossary.html#par_textimage_18 for a list of the insurance type definitions.

Beginning in 2017, selected variable categories were updated, including age-categories, income-to-poverty ratio (IPR) categories, and the age universe for certain employment and education variables. See user note entitled "Health Insurance Table Updates" for further details.

The 2015-2019 American Community Survey (ACS) data generally reflect the September 2018 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances, the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineation lists due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

An "**" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution, or the margin of error associated with a median was larger than the median itself.

An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution. An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution. An "***" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An "*****" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An "N" entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An "(X)" means that the estimate is not applicable or not available.

12/10/2020 https://data.census.gov/cedsci/table?g=0600000US3610706145&d=ACS 5-Year Estimates Data Profiles&tid=ACSDP5Y2019.DP03&m...

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

SELECTED HOUSING CHARACTERISTICS

Survey/Program:

American Community Survey

Year: 2019

Estimates: 5-Year

Table ID: DP04

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Source: U.S. Census Bureau, 2015-2019 American Community Survey 5-Year Estimates

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.

Households not paying cash rent are excluded from the calculation of median gross rent.

Telephone service data are not available for certain geographic areas due to problems with data collection of this question that occurred in 2015, 2016, and 2019. Both ACS 1-year and ACS 5-year files were affected. It may take several years in the ACS 5-year files until the estimates are available for the geographic areas affected.

The 2015-2019 American Community Survey (ACS) data generally reflect the September 2018 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances, the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineation lists due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

An "**" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution, or the margin of error associated with a median was larger than the median itself.

An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution. An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution. An "***" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

12/10/2020 https://data.census.gov/cedsci/table?g=0600000US3610706145&d=ACS 5-Year Estimates Data Profiles&tid=ACSDP5Y2019.DP04&m...

An "*****" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An "N" entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An "(X)" means that the estimate is not applicable or not available.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

SURVEY/PROGRAM American Community Survey

	TOWN OF OWEGO	
Label	Estimate	Percent
HOUSEHOLDS BY TYPE		
Total households	7,961	7,961
Married-couple family	4,350	54.6%
With own children of the householder		
under 18 years	1,435	18.0%
Cohabiting couple household	532	6.7%
With own children of the householder		
under 18 years	198	2.5%
Male householder, no spouse/partner		
present	1,055	13.3%
With own children of the householder		
under 18 years	73	0.9%
Householder living alone	898	11.3%
65 years and over	302	3.8%
Female householder, no spouse/partner		
present	2,024	25.4%
With own children of the householder		
under 18 years	193	2.4%
Householder living alone	1,438	18.1%
65 years and over	859	10.8%
Households with one or more people under		
18 years	2,108	26.5%
Households with one or more people 65		
years and over	2,846	35.7%
Average household size	2.33	(X)
Average family size	2.86	(X)
RELATIONSHIP		
Population in households	18,549	18,549
Householder	7,961	42.9%

Spouse	4,333	23.4%
Unmarried partner	523	2.8%
Child	4,728	25.5%
Other relatives	667	3.6%
Other nonrelatives	337	1.8%
MARITAL STATUS		2.070
Males 15 years and over	7,705	7,705
Never married	2,235	29.0%
Now married, except separated	4,592	59.6%
Separated	97	1.3%
Widowed	158	2.1%
Divorced	623	8.1%
Females 15 years and over	8,177	8,177
Never married	1,827	22.3%
Now married, except separated	4,478	54.8%
Separated	182	2.2%
Widowed	836	10.2%
Divorced	854	10.4%
FERTILITY		
Number of women 15 to 50 years old who had		
a birth in the past 12 months	292	292
Unmarried women (widowed, divorced, and		
never married)	129	44.2%
Per 1,000 unmarried women	67	(X)
Per 1,000 women 15 to 50 years old	79	(X)
Per 1,000 women 15 to 19 years old	0	(X)
Per 1,000 women 20 to 34 years old	166	(X)
Per 1,000 women 35 to 50 years old	42	(X)
GRANDPARENTS		` ,
Number of grandparents living with own		
grandchildren under 18 years	212	212
Grandparents responsible for grandchildren	101	47.6%
Years responsible for grandchildren		
Less than 1 year	10	4.7%
1 or 2 years	11	5.2%
3 or 4 years	19	9.0%
5 or more years	61	28.8%

Number of grandparents responsible for own		
grandchildren under 18 years	101	101
Who are female	63	62.4%
Who are married	72	71.3%
SCHOOL ENROLLMENT		
Population 3 years and over enrolled in school	4,025	4,025
Nursery school, preschool	204	5.1%
Kindergarten	183	4.5%
Elementary school (grades 1-8)	1,584	39.4%
High school (grades 9-12)	1,057	26.3%
College or graduate school	997	24.8%
EDUCATIONAL ATTAINMENT		
Population 25 years and over	13,659	13,659
Less than 9th grade	145	1.1%
9th to 12th grade, no diploma	666	4.9%
High school graduate (includes equivalency)	4,048	29.6%
Some college, no degree	2,173	15.9%
Associate's degree	1,814	13.3%
Bachelor's degree	2,870	21.0%
Graduate or professional degree	1,943	14.2%
High school graduate or higher	12,848	94.1%
Bachelor's degree or higher	4,813	35.2%
VETERAN STATUS		
Civilian population 18 years and over	15,106	15,106
Civilian veterans	1,281	8.5%
DISABILITY STATUS OF THE CIVILIAN		
NONINSTITUTIONALIZED POPULATION		
Total Civilian Noninstitutionalized Population	18,642	18,642
With a disability	2,560	13.7%
Under 18 years	3,710	3,710
With a disability	85	2.3%
18 to 64 years	11,032	11,032
With a disability	1,250	11.3%
65 years and over	3,900	3,900
With a disability	1,225	31.4%
RESIDENCE 1 YEAR AGO		
Population 1 year and over	18,634	18,634

Same house	16,545	88.8%
Different house in the U.S.	2,065	11.1%
Same county	940	5.0%
Different county	1,125	6.0%
Same state	836	4.5%
Different state	289	1.6%
Abroad	24	0.1%
PLACE OF BIRTH		
Total population	18,827	18,827
Native	18,340	97.4%
Born in United States	18,252	96.9%
State of residence	13,622	72.4%
Different state	4,630	24.6%
Born in Puerto Rico, U.S. Island areas, or		
born abroad to American parent(s)	88	0.5%
Foreign born	487	2.6%
U.S. CITIZENSHIP STATUS		
Foreign-born population	487	487
Naturalized U.S. citizen	319	65.5%
Not a U.S. citizen	168	34.5%
YEAR OF ENTRY		
Population born outside the United States	575	575
Native	88	88
Entered 2010 or later	0	0.0%
Entered before 2010	88	100.0%
Foreign born	487	487
Entered 2010 or later	107	22.0%
Entered before 2010	380	78.0%
WORLD REGION OF BIRTH OF FOREIGN BORN		
Foreign-born population, excluding population		
born at sea	487	487
Europe	141	29.0%
Asia	149	30.6%
Africa	0	0.0%
Oceania	0	0.0%
Latin America	135	27.7%
Northern America	62	12.7%

LANGUAGE SPOKEN AT HOME

LANGUAGE SPUNEN AT HOIVIE		
Population 5 years and over	17,838	17,838
English only	17,209	96.5%
Language other than English	629	3.5%
Speak English less than "very well"	109	0.6%
Spanish	358	2.0%
Speak English less than "very well"	65	0.4%
Other Indo-European languages	161	0.9%
Speak English less than "very well"	0	0.0%
Asian and Pacific Islander languages	110	0.6%
Speak English less than "very well"	44	0.2%
Other languages	0	0.0%
Speak English less than "very well"	0	0.0%
ANCESTRY		
Total population	18,827	18,827
American	1,027	5.5%
Arab	7	0.0%
Czech	133	0.7%
Danish	34	0.2%
Dutch	459	2.4%
English	2,777	14.8%
French (except Basque)	318	1.7%
French Canadian	114	0.6%
German	3,400	18.1%
Greek	74	0.4%
Hungarian	137	0.7%
Irish	3,151	16.7%
Italian	1,945	10.3%
Lithuanian	135	0.7%
Norwegian	138	0.7%
Polish	1,605	8.5%
Portuguese	34	0.2%
Russian	320	1.7%
Scotch-Irish	128	0.7%
Scottish	332	1.8%
Slovak	315	1.7%
Subsaharan African	0	0.0%

Swedish	260	1.4%	
Swiss	85	0.5%	
Ukrainian	210	1.1%	
Welsh	296	1.6%	
West Indian (excluding Hispanic origin			
groups)	9	0.0%	
COMPUTERS AND INTERNET USE			
Total households	7,961	7,961	
With a computer	7,093	89.1%	
With a broadband Internet subscription	6,761	84.9%

Table Notes

SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

Survey/Program:

American Community Survey

Year: 2019

Estimates: 5-Year

Table ID: DP02

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Source: U.S. Census Bureau, 2015-2019 American Community Survey 5-Year Estimates

In 2016, changes were made to the computer and Internet use questions, involving the wording as well as the response options. A crosswalk was used to map pre-2016 data to the post-2016 categories, enabling creation of 5-year data. For more detailed information about the 2016 changes, see the 2016 American Community Survey Content Test Report for Computer and Internet Use located at https://www.census.gov/library/working-papers/2017/acs/2017_Lewis_01.html or the user note regarding changes in the 2016 questions located at https://www.census.gov/programs-surveys/acs/technical-documentation/user-notes/2017-03.html. For more detailed information about the crosswalk, see the user note regarding the crosswalk located at

https://www.census.gov/programs-surveys/acs/technical-documentation/user-notes.html

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.

Ancestry listed in this table refers to the total number of people who responded with a particular ancestry; for example, the estimate given for Russian represents the number of people who listed Russian as either their first or second ancestry. This table lists only the largest ancestry groups; see the Detailed Tables for more categories. Race and Hispanic origin groups are not included in this table because official data for those groups come from the Race and Hispanic origin questions rather than the ancestry question (see Demographic Table).

Data for year of entry of the native population reflect the year of entry into the U.S. by people who were born in Puerto Rico or U.S. Island Areas or born outside the U.S. to a U.S. citizen parent and who subsequently moved to the U.S.

Methodological changes to citizenship edits may have affected citizenship data for those born in American Samoa. Users should be aware of these changes when using 2018 data or multi-year data containing data from 2018. For more information, see: American Samoa Citizenship User Note.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

12/10/2020

Data about computer and Internet use were collected by asking respondents to select "Yes" or "No" to each type of computer and each type of Internet subscription. Therefore, respondents were able to select more than one type of computer and more than one type of Internet subscription.

The category "with a broadband Internet subscription" refers to those who said "Yes" to at least one of the following types of Internet subscriptions: Broadband such as cable, fiber optic, or DSL; a cellular data plan; satellite; a fixed wireless subscription; or other non-dial up subscription types.

An Internet "subscription" refers to a type of service that someone pays for to access the Internet such as a cellular data plan, broadband such as cable, fiber optic or DSL, or other type of service. This will normally refer to a service that someone is billed for directly for Internet alone or sometimes as part of a bundle.

"With a computer" includes those who said "Yes" to at least one of the following types of computers: Desktop or laptop; smartphone; tablet or other portable wireless computer; or some other type of computer.

The 2015-2019 American Community Survey (ACS) data generally reflect the September 2018 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances, the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineation lists due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

An "**" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution, or the margin of error associated with a median was larger than the median itself.

An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution. An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution. An "***" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An "*****" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An "N" entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An "(X)" means that the estimate is not applicable or not available.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.
