

HOW TO SETUP UNITS

Step 1:

Stand facing one of the frame's Secure Bag Locks (the loops). Place one foot on the bottom rung to stabilize the frame.

Insert empty bag inside of the frame. Using two hands, pull approximately 6" of bag through the loop as shown. For best chance of visibility, be sure the printed side is completely facing one of the open ends of the frame

Step 2:

Still using two hands, pull the bag 6" over the loop and toward the center, making sure to wrap it around the corners.

Step 3:

Let go of the end of the bag and grasp the bag as shown. Pull down and in until it tightens around the corners. The bag will tighten around the Secure-Lock so it cannot slip off.

Step 4:

Press down on frame to extend to full opening width. This will make the lid fit snugly.

Local Outlets for Clear Plastic Bags
